

# Join the ideas explosion!

**Do you teach some young scientists or engineers who deserve recognition?** If they're 11-18 with a great project or invention...enter the National Science & Engineering Competition today. There's over £50,000 of prizes, including cash awards and trips abroad – plus the prestige of winning a high profile competition for your school or college and the teachers involved.

The lucky finalists will be invited to showcase their work to around 13,000 students, teachers, journalists and VIPs visiting The Big Bang: UK Young Scientists' and Engineers' Fair in Manchester in March 2010. Here your students can mix and compete with the country's best – and gather tips and advice from working scientists and engineers from all fields in business and research. With plenty of individual and team prizes up for grabs, there are lots of opportunities for all students, and the two winning individuals in the senior category will be crowned the UK Young Scientist of the Year and Young Engineer of the Year.
